7 FUNCTIONAL RELATIONSHIPS ............................................................................ 220-5
8 FUNCTIONAL DIAGRAM ......................................................................................... 220-6
1 PURPOSE AND SCOPE
This document outlines Space Planning Criteria for Chapter 220: Credit Union. It applies to all medical facilities at the Department of Veterans Affairs (VA).

2 DEFINITIONS
Accessible: A site, building, facility, or portion thereof that complies with provisions outlined in the Architectural Barriers Act of 1968 (ABA).

Architectural Barriers Act (ABA): A set of standards developed to insure that all buildings financed with federal funds are designed and constructed to be fully accessible to everyone. This law requires all construction, renovation, or leasing of sites, facilities, buildings, and other elements, financed with federal funds, to comply with the Architectural Barriers Act Accessibility Standards (ABAAS). The ABAAS replaces the Uniform Federal Accessibility Standards (UFAS).

Credit Union: A cooperative organization chartered by state or federal government that accepts savings from its members and makes low interest loans to its members. Credit unions are normally formed among members who are employed by the same company or are members of the same organization.

Full-Time Equivalent (FTE): A staffing parameter equal to the amount of time assigned to one full time employee. It may be composed of several part-time employees whose total time commitment equals that of a full-time employee. One FTE equals a 40 hours per week.

Full Service Credit Union: A program that employs a full-time staff to serve eligible Credit Union members.

Functional Area: The grouping of rooms and spaces based on their function within a clinical service. Typical Functional Areas are Reception Areas, Patient Areas, Support Areas, Staff and Administrative Areas, and Residency Program.

Input Data Statements: A set of questions designed to elicit information about the healthcare project in order to create a Program for Design (PFD) based on the criteria parameters set forth in this document. Input Data Statements could be Mission related, based in the project’s Concept of Operations; and Workload or Staffing related, based on projections and data provided by the VHA or the VISN about the estimated model of operation for the facility. This information is processed through mathematical and logical operations in VA-SEPS.

Itinerant Service Credit Union: A program of part-time service provided by a full-time Credit Union employee based at another location, making scheduled visits, or by a part-time employee designated to serve on a regular schedule.

Program for Design (PFD): A space program based on criteria set forth in this document and specific information about Concept of Operations, workload projections and staffing levels authorized.

SEPS (VA-SEPS): Acronym for Space and Equipment Planning Systems, a digital tool developed by the Department of Defense (DoD) and the Department of Veterans Affairs to generate a Program for Design (PFD) and an Equipment List for a VA healthcare project based on specific information entered in response to Input Data Questions. VA-SEPS incorporates the propositions set forth in all VA Space Planning Criteria chapters. VA-SEPS has been designed to aid healthcare planners in creating a space plan based on a standardized set of criteria parameters.
Workload: Workload is the anticipated number of procedures or suite stops that is processed through a department/service area. The total workload applied to departmental operational assumptions will determine overall room requirements by modality.

3 OPERATING RATIONALE AND BASIS OF CRITERIA
A. Workload Projections or planned services / modalities for a specific VA medical center, hospital or outpatient clinic project are provided by the VA Central Office (VACO) / VISN CARES Capacity Projection Model. The workload projections are generated by methodology based upon the expected veteran population in the respective market/service area. Healthcare planners working on VA medical center, hospital or outpatient clinic projects will utilize and apply the workload criteria set forth herein for identified services and modalities to determine room requirements for each facility.

B. Space planning criteria have been developed on the basis of an understanding of the activities involved in the functional areas of the Credit Union and its relationship with other services of a medical facility. These criteria are predicated on established and/or anticipated best practice standards, as adapted to provide environments supporting the highest quality health care for Veterans.

C. These criteria are subject to modification relative to development in the equipment, medical practice, vendor requirements, and subsequent planning and design. The selection of the size and type of Credit Union equipment is determined by VACO and upon Veterans Health Administration (VHA) anticipated medical needs.

4 INPUT DATA STATEMENTS
A. Mission Input Data Statements
1. Is a Credit Union Manager FTE position authorized? (M)
2. Is a full service Credit Union authorized? (M)
3. Is use of Automated Teller Machines (ATMs) authorized? (M)
   a. How many Automated Teller Machines (ATMs) are authorized? (Misc)

B. Workload Input Data Statements
1. How many Teller FTE positions are authorized? (S)
2. How many Supervisor FTE positions are authorized? (S)
3. How many Loan / Accounts Officer FTE positions are authorized? (S)
4. How many Clerical Staff FTE position are authorized? (S)

C. Staffing Input Data Statements
None

D. Miscellaneous Input Data Statements
None

5 SPACE CRITERIA
A. FA 1: Lobby and Teller Area:
1. Staff Area / Service Window (CASH1)..................................... 60 NSF (5.6 NSM)
   Provide one per each Teller FTE position authorized.
   Teller operating space plus common teller use area. Included in this space may be a safe, stool, service counter with a public and private side, and counter/cabinets for table top equipment.
2. **Public Space (LOB01)** ............................................................... 60 NSF (5.6 NSM)
   
   Minimum NSF; provide an additional 60 NSF per each Teller FTE position authorized greater than one.

   Includes queuing space and customer’s writing counter, casework for loan or buyers’ reference material, study space with table and one chair.

3. **Automated Teller Machine (ATM) (BF001) ............................................. 30 NSF (2.8 NSM)

   Provide one per each Automated Teller Machine authorized.

   The above space is needed for the machine, member queuing and circulation; it can be reduced to 15 NSF if machine is in alcove.

**B. FA 2: Staff and Administrative Area:**

1. **Office, Credit Union Manager (OFA09) .................................. 100 NSF (9.3 NSM)

   Provide one if a Credit Union Manager FTE position is authorized.

2. **Office, Supervisor (OFA09) .................................................... 100 NSF (9.3 NSM)

   Provide one per each Supervisor FTE position authorized.

3. **Workstation, Loan / Accounts Officer (OFA07) ...................... 56 NSF (5.3 NSM)

   Provide one per each Loan / Accounts Officer FTE position authorized.

4. **Workstation, Clerical (OFA07) .................................................. 56 NSF (5.3 NSM)

   Provide one per each Clerical Staff FTE position authorized.

5. **Alcove, Copier / Printer (RPR03) .............................................. 60 NSF (5.6 NSM)

   Provide one for the Credit Union.

   Allocated NSF accommodates file cabinets, ADP space, printer, and reproduction equipment.

**C. FA 3: Support Area:**

1. **Vault (SSV01) ............................................................................. 80 NSF (7.6 NSM)

   Provide one if Full Service Credit Union is authorized.

2. **Storage Room (SRSE1) ............................................................. 40 NSF (3.7 NSM)

   Provide one if Full Service Credit Union is authorized.

3. **Toilet, Staff (TNPG1) ................................................................. 60 NSF (5.6 NSM)

   Provide one if a Full Service Credit Union is authorized.

   Allocated NSF accommodates one accessible toilet @ 25 NSF, one wall-hung lavatory @ 12 NSF, ABA clearances, and circulation.

6 **PLANNING AND DESIGN CONSIDERATIONS**

   **A.** Departmental Net-to-Gross factor (DNTG) for Credit Union is 1.30. This number when multiplied by the programmed net square foot (NSF) area determines the departmental gross square feet.

   **B.** Security and privacy of transactions should be major considerations.

   **C.** If the Credit Union is not located at the Medical Center or is remote and provides services to several organizations, the minimal function at the VAMC may be an Automated Teller Machine.

7 FUNCTIONAL RELATIONSHIPS
Relationship of Credit Union to services listed below:

TABLE 1: CREDIT UNION

<table>
<thead>
<tr>
<th>SERVICES</th>
<th>RELATIONSHIP</th>
<th>REASON</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lobby</td>
<td>2</td>
<td>H, I</td>
</tr>
<tr>
<td>Canteen Service</td>
<td>2</td>
<td>H, I</td>
</tr>
<tr>
<td>Recreation Service</td>
<td>3</td>
<td>H</td>
</tr>
<tr>
<td>Voluntary Service</td>
<td>2</td>
<td>I</td>
</tr>
</tbody>
</table>

Legend:

Relationship:

1. Adjacent
2. Close / Same Floor
3. Close / Different Floor Acceptable
4. Limited Traffic
5. Separation Desirable

Reasons:

A. Common use of resources
B. Accessibility of supplies
C. Urgency of contact
D. Noise or vibration
E. Presence of odors or fumes
F. Contamination hazard
G. Sequence of work
H. Patient’s convenience
I. Frequent contact
J. Need for security
K. Others (specify)
